

# ONLINE BOOKING TOOL

Online booking tools are an essential part of corporate travel management, giving the business traveller autonomy and control over their own travel arrangements.

XL Turners Travel offers two options for you to take control of your routine travel arrangements. Each has their own features and benefits, and pricing plans to suite your company's needs.

We use TRAVX and Travelsoft's Travelsaver. Both are Galileo approved and provide high levels of encryption ensuring our travellers' personal information is safe. These tools integrate seamlessly into our system and ensure that bookings comply with the traveller's company travel management policy.

## Advantages of an Online Platform

Our online booking tools provide flexibility, efficiency and accountability. The user interface is easy to navigate ensuring a smooth and reliable process for planning and booking travel at the touch of a button.

**Reduced Costs** – The online booking tool is a cost effective option as it bypasses the labour intensive manual booking procedures.

**100% compliance** – The authorisation process ensures rigid compliance with the approved travel policy.

**Search & Compare** – Travellers can make informed decisions based on reliable and accurate information.

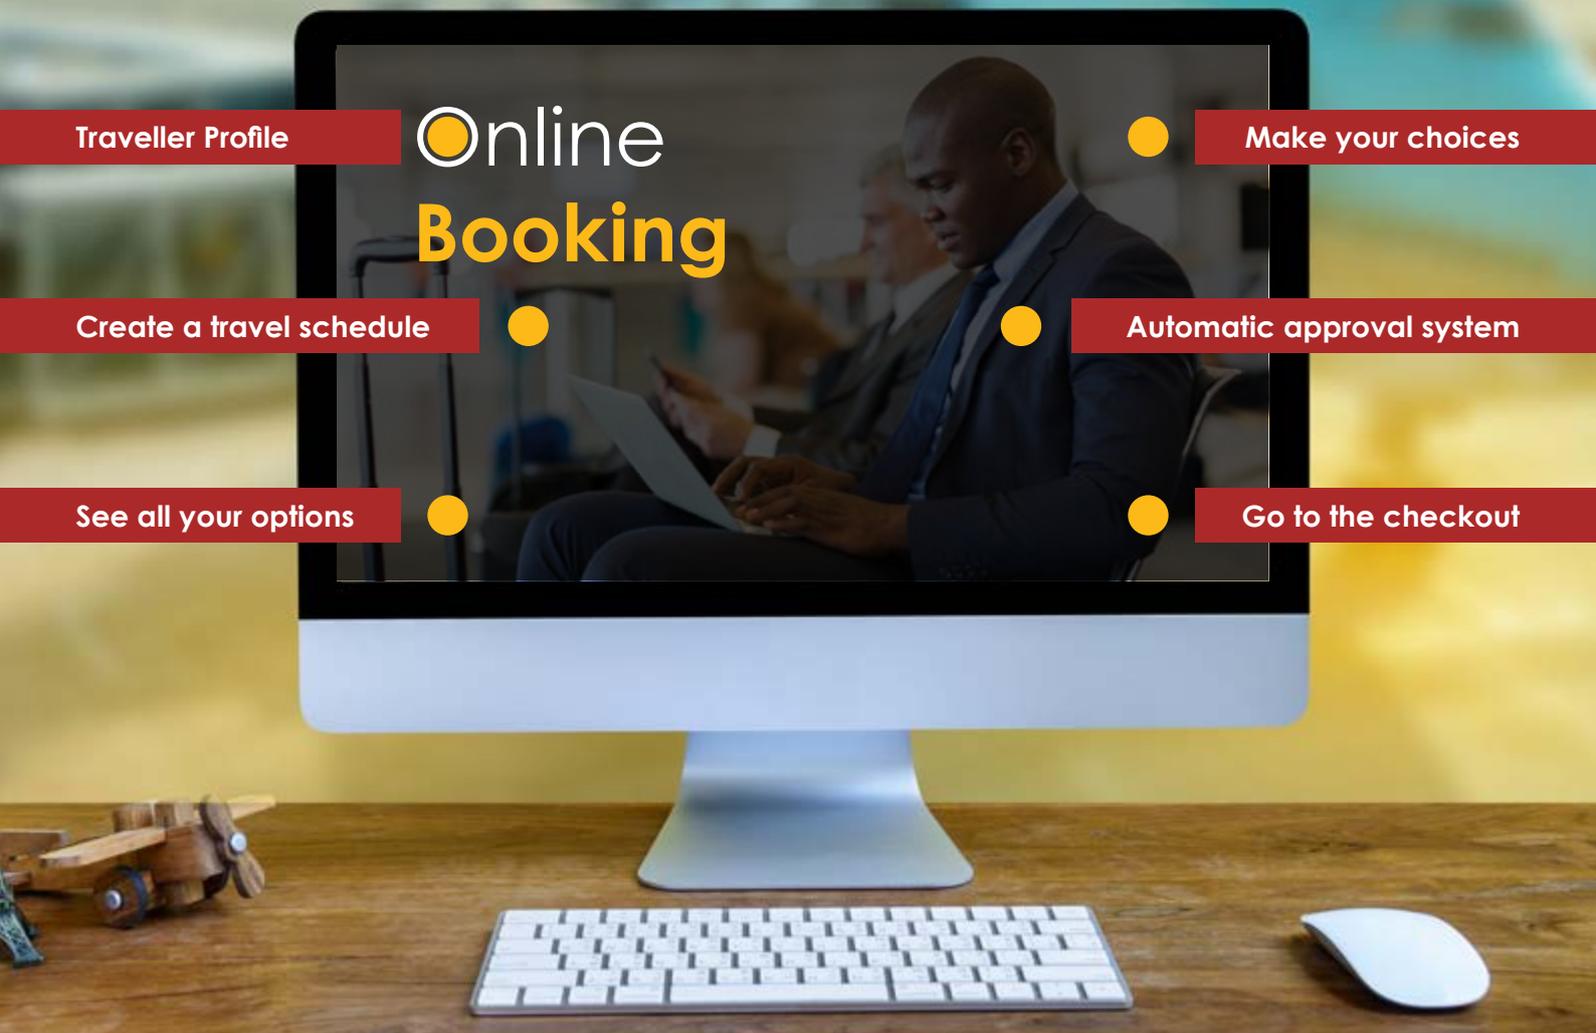

**Options & Choices** – The system presents the user all the available options for flights, accommodation and car hire.

**Accountability** – The built-in parameters help manage the process with strict controls and provides full accountability for the travel spend.

**Up-to-date Travel Profiles** – Each traveller is responsible for their own travel profile which informs the options available to them.

# IT COULD NOT BE EASIER

The system has an efficient search engine which presents the user with a one-stop-shop for local and international flights, car hire, all types of accommodation and ground arrangements at destination.

## Why are we different?

### Hybrid Approach

Clients can choose to be fully autonomous or opt for some consultant assistance. Our hybrid approach is born out of our belief that, regardless of the technology, we should never lose the human touch.

### Payment Solutions

Our system provides for different methods of payment.

### Flexible Pricing Structure

Not all businesses are the same, nor is their travel. Our online booking service can be tailored to the client's needs and costs can be structured accordingly.

### Personal Oversight

We can arrange for our consultants to check itineraries and bookings before tickets are issued, adding an extra level of confidence and comfort in the automated process.

### We don't have a Call Centre

We always have at least one of our professional travel consultants available 24/7. When you call the after-hours number you will be speaking to an XL Turners Travel employee.

### Onsite Training

One of our Business Development Managers will be onsite, during the roll out phase to assist your Travel Bookers and ensure they can use the system with confidence.
